Martin Hewitt is an ex lawyer's assistant who eventually found his inclination better suited to crime investigation. He is a low-key, realistic, lower class answer to Sherlock Holmes, though his cases are just as weird and mysterious as Holmes's. Martin Hewitt stories are similar in style to those of Arthur Conan Doyle, cleverly plotted and very amusing, while the character himself is a bit less arrogant and a bit more charming than Holmes.

Arthur Morrison (1863-1945) was an English writer and journalist known for his realistic novels and stories about working-class life in London's East End, and for his detective stories, featuring Martin Hewitt and Horace Dorrington.

Influence is not accidental. It is earned. In, But Not Of charts the course to acquiring influence over the life of a career while remaining committed to the commands

and example of Christ. Broadcast journalist and law professor Hugh Hewitt not only challenges us to become more engaged in steering the course of history through politics, law, finance, and entertainment, but he also maps out simple, effective strategies that will enable us to bring our visions of influence to pass. Along with Hugh's simple and helpful advice, the study guide in the back focuses on key selections and questions to help the reader, whether in group or individual sessions, internalize these valuable principles and make a difference in the world. Divided into Think About It, Find Out More, and Take Action, the guide concludes with a Summary of Your Decisions to serve as a quick reference for years to come. I had been working double tides for a month: at night on my morning paper, as usual; and in the morning on an evening paper as locum tenens for another man who was taking a holiday. This was an exhausting plan of work, although it only actually involved some six hours' attendance a day, or less, at the two offices. I turned up at the headquarters of my own paper at ten in the evening, and by the time I had seen the editor, selected a subject, written my leader, corrected the slips, chatted, smoked, and so on, and cleared off, it was very usually one o'clock. This meant bed at two, or even three, after supper at the club..... Martin Hewitt is an ex lawyer's assistant who eventually found his inclination better suited to crime investigation. In 1992, former Grand Slam tennis champion Bob Hewitt was inducted into the International Tennis Hall of Fame. In 2012, he was indefinitely suspended following multiple allegations of sexual misconduct from women he coached as young girls. On 23 March 2015, Hewitt was found guilty of two counts of rape and one of sexual assault after a watershed trial that has changed the legal landscape and how the South African judicial system prosecutes historic rape. This book takes the reader behind the scenes of the trial that shook the foundations of the international sporting world. It follows the case against Hewitt instituted by Suellen Sheehan and two fellow accusers, only a few of the dozens of survivors who allegedly suffered abuse at his hands. The result was a six-year prison sentence handed down to the frail 75-year-old, more than 30 years after his crimes. Justice Served? The Trial and Conviction of Bob Hewitt covers various perspectives of the trial, from that of the state prosecutor to the defence advocate and other key role-players, includes Hewitt's appeal of sentence in 2016, and chronicles the spectacular fall from grace of a world-famous tennis legend. Sir John Butterfill, Mr Stephen Byers, Ms Patricia Hewitt, Mr Geoff Hoon, Mr Richard Caborn and Mr Adam Ingram : Ninth report of session 2010-11, Vol. 2: Appendices, written and oral Evidence Peter Cooper believed that he owed a debt to the city that had made him a rich man. During the nineteenth century, he made his fortune in industry and his name in politics, and he always felt a strong compulsion to give back to New York. His greatest achievement was the establishment of The Cooper Union, which allowed students from all walks of life to study science and art and is still providing those opportunities today. Cooper instilled this sense of obligation in his children and his business partner and son-in-law, Abram Hewitt. Abram's daughters--remarkable women ahead of their time--fulfilled their grandfather's dream of opening a museum, which became the Cooper-Hewitt National Design Museum, today part of the Smithsonian Institution. Discover this amazing story of wealth and generosity, politics and integrity and family and community that could have only unfolded in New York. The subject matter of the 36 tests presented in this document deals principally with three areas of Tuscarora culture: cosmological and traditional religious beliefs, medical practices, and mythic traditions. However, just as religion, medicine and myth do not appear to have been highly differentiated spheres of traditional Tuscarora society, they

are seldom treated apart in individual texts. This volume organizes texts around three areas, placing those texts in which religious themes dominate together, and so on. Cosmological and religious topics are the dominant elements in the first four of the texts. The following 19 are concerned with medical practices. Included are texts which indicate how specific diseases are to be treated, and specific medicines prepared; texts which describe the roles which medicines and medical practitioners played in traditional Tuscarora society; and texts which deal with sorcery and witchcraft, practices which were intimately connected with medicine among the Tuscarora. The last 13 texts focus on Tuscarora mythic traditions, and describe many of the major characters who populated these myths. This study questions the validity of John Hewitt's prominence in Northern Irish Protestant writing and asserts the need for a more accurate history of this genre. Confronting the perceived wisdoms of a highly politicized discourse, it undermines Hewitt's status within it as a matchless, acceptable Protestant for a critically re-visioned Ireland. Challenging the substance of Hewitt's self-representations as icon of cultural liberalism, radical secular dissenter, and verse-apologist for the Planter condition, this book shows that his elevation over the majority of northern Protestants is tenable only within an incomprehensive history of Northern Irish Protestant writing that diminishes other important figures. The study provides a framework for a more equitable study of Protestant voices. I have already recorded many of the adventures of my friend Martin Hewitt, but among them there have been more of a certain few which were discovered to be related together in a very extraordinary manner; and it is to these that I am now at liberty to address myself. There may have been others—cases which gave no indication of their connection with these; some of them indeed I may have told without a suspicion of their connection with the Red Triangle; but the first in which that singular accompaniment

became apparent was the matter of Samuel's diamonds. The case exhibited many interesting features, and I was very anxious to report it, with perhaps even less delay than I had thought judicious in other cases; but Hewitt restrained me..... William Hewett (1749-1826) was born in Warrington, England to John and Hannah Hewett. In 1775 he came to America where he settled in New Hampshire. In 1781 he married Sarah King (1754-1837). Sarah was the daughter of Benjamin and Sarah Taylor King and was born in New Hampshire. By 1787 they had moved to Maine where they spent their remaining years. They were the parents of seven children. Descendants live in New England and other parts of the United States.

North-Holland Mathematics Studies: Hewitt-Nachbin Spaces exposes the theory of Hewitt-Nachbin spaces, also called realcompact or Q-spaces, taking into account synergistic points of view from which these spaces are investigated. The publication first offers information on embedding in topological products and Hewitt-Nachbin spaces and convergence, including notation and terminology, embedding lemma, E-completely regular spaces, E-compact spaces, and characterizations and properties of Hewitt-Nachbin spaces. The text also touches on Hewitt-Nachbin spaces, uniformities, and related topological spaces, as well as Hewitt-Nachbin completeness and uniform spaces, review of uniform spaces, and almost realcompact and cb-spaces. The book takes a look at Hewitt-Nachbin completeness and continuous mappings. Discussions focus on classes of mappings, perfect mappings, WZ mappings, closed mappings and Hewitt-Nachbin spaces, and E-perfect mappings. The manuscript is a reliable reference for readers interested in Hewitt-Nachbin spaces.

Sherlock Holmes's contemporary solves nine mysteries that include a rash of jewel robberies, the theft of a sacred relic, a suicide that might have been a murder, and other intriguing cases. Those who retain any memory of the great law cases of fifteen or twenty years back will

remember, at least, the title of that extraordinary will case, "Bartley v. Bartley and others," which occupied the Probate Court for some weeks on end, and caused an amount of public interest rarely accorded to any but the cases considered in the other division of the same court. The case itself was noted for the large quantity of remarkable and unusual evidence presented by the plaintiff's side—evidence that took the other party completely by surprise, and overthrew their case like a house of cards. The affair will, perhaps, be more readily recalled as the occasion of the sudden rise to eminence in their profession of Messrs. Crellan, Hunt & Crellan, solicitors for the plaintiff—a result due entirely to the wonderful ability shown in this case of building up, apparently out of nothing, a smashing weight of irresistible evidence. That the firm has since maintained—indeed enhanced—the position it then won for itself need scarcely be said here; its name is familiar to everybody. But there are not many of the outside public who know that the credit of the whole performance was primarily due to a young clerk in the employ of Messrs. Crellan, who had been given charge of the seemingly desperate task of collecting evidence in the case....

The charming story of one family's mission to build a deeper, lasting connection to land and community on their Vermont farm

When Ben Hewitt and his wife bought a sprawling acreage of field and forest in northern Vermont, they were eager to start a self-sustaining family farm. But over the years, the land became so much more than a building site; it became the birthplace of their two sons, the main source of family income and food, and even a classroom for their children. Through self-directed play, exploration, and experimentation on their farm, Hewitt's children learned how to play and read, test boundaries and challenge themselves, fail and recover. Best of all, this environment allowed their personalities to flourish, fueling further growth. In *Home Grown*, Hewitt shows us how small, mindful decisions about day-to-

day life can lead to greater awareness of the world in our backyards and beyond. In telling the story of his sons' unconventional education in the fields and forests surrounding his family's farm, he demonstrates that the sparks of learning are all around us, just waiting to be discovered. Learning is a lifelong process—and the best education is never confined to a classroom.
