Brothels, Bordellos & Bad Girls May 22 2022 This look at prostitution in Colorado, 1860-1930, uncovers the lives and woes of "working girls" in mining towns such as Cripple Creek.

The National Elementary Principal Oct 15 2021 Beginning with v. 2 includes the Yearbook of the Dept. of Elementary School Principals of the National Education Association of the United States and beginning with v. 34 includes the department's Membership directory and annual report.

**Opera for the People** Jan 26 2020 Opera for the People is an in-depth examination of a forgotten chapter in American social and cultural history: the love affair that middle-class Americans had with continental opera (translated into English) in the 1870s, 1880s, and 1890s. Author Katherine Preston reveals how-contrary to the

existing historiography on the American musical culture of this period-English-language opera not only flourished in the United States during this time, but found its success significantly bolstered by the support of women impresarios, prima-donnas, managers, and philanthropists who provided financial backing to opera companies. This rich and compelling study details the lives and professional activities of several important players in American postbellum opera, including manager Effie Ober, philanthropist Jeannette Thurber, and performers/artistic directors Caroline Richings, Euphrosyne Parepa-Rosa, Clara Louise Kellogg, and "the people's prima donna" Emma Abbott. Drawing from an impressive range of primary sources, including contemporaneous music and theater periodicals, playbills, memoirs, librettos, scores, and reviews and commentary on the performances in digitized newspapers, Preston tells the story of how these and other women influenced the activities of some of the more than one hundred opera companies touring the United States during the second half of the 19th century, performing opera in English for a diverse range of audiences. Countering a pervasive and misguided historical understanding of opera reception in the United States-unduly influenced by modern attitudes about the genre as elite, exclusive, expensive, and of interest only to a niche market-Opera for the People demonstrates the important (and hitherto unsuspected) place of opera in the rich cornucopia of late-century American musical theatre, which would eventually lead to the emergence of American musical comedy.

**Jewish Denver** Jan 06 2021 In 1859, during the Pike's Peak gold rush, at least 12 Jews joined the great migration to Colorado in search of gold and a brighter future. The unpredictability of mining and a growing demand for supplies encouraged many of these Jewish settlers to establish small businesses in Denver and in towns and mining camps across the state. By the early 1870s, Jewish benevolent societies and a congregation were established. Denver's dry, mild climate attracted patients with tuberculosis, and two Jewish sanatoriums were opened in the city around the beginning of the 20th century. Many of the predominantly Eastern European Jews who came in search of better health made Denver their home, thus augmenting the early Jewish population significantly. Today Jewish life flourishes in Colorado, and Jewish citizens continue to play a vital role in its culture and development.

**Preparing Teachers for Deeper Learning** Mar 28 2020 Preparing Teachers for Deeper Learning answers an urgent call for teachers who educate children from

diverse backgrounds to meet the demands of a changing world. In today's knowledge economy, teachers must prioritize problem-solving ability, adaptability, critical thinking, and the development of interpersonal and collaborative skills over rote memorization and the passive transmission of knowledge. Authors Linda Darling-Hammond and Jeannie Oakes and their colleagues examine what this means for teacher preparation and showcase the work of programs that are educating for deeper learning, equity, and social justice. Guided by the growing knowledge base in the science of learning and development, the book examines teacher preparation programs at Alverno College, Bank Street College of Education, High Tech High's Intern Program, Montclair State University, San Francisco Teacher Residency, Trinity University, and University of Colorado Denver. These seven programs share a common understanding of how people learn that shape similar innovative practices. With vivid examples of teaching for deeper learning in coursework and classrooms; interviews with faculty, school partners, and novice teachers; surveys of teacher candidates and graduates; and analyses of curriculum and practices, *Preparing Teachers for Deeper Learning* depicts transformative forms of teaching and teacher preparation that honor and expand all students' abilities, knowledges, and experiences, and reaffirm the promise of educating for a better world.

**Cather Studies, Volume 11** Jun 30 2020 Willa Cather at the Modernist Crux examines Willa Cather's position in time, in aesthetics, and in the world. Born a Victorian in 1873, Cather made herself a modernist through the poems, stories, and novels she wrote and published into the twentieth century. Beginning with a prologue locating Cather's position, this volume of *Cather Studies* offers three sets of related essays. The first section takes up Cather's beginnings with her late nineteenth-century cultural influences. The second section explores a range of discernible direct connections with contemporary artists (Howard Pyle, Frederic Remington, and Ernest Blumenschein) and others who figured in the making of her texts. The third section focuses on *The Song of the Lark*, a novel that confirms Cather's shift westward and elaborates her emergent modernism. An epilogue by the editors of *The Selected Letters of Willa Cather* addresses how the recent availability of these letters has transformed Cather studies. Altogether, these essays detail Cather's shaping of the world of the early twentieth century and later into a singular modernism born of both inherited and newer cultural traditions.

[The Street Politics of Abortion](#) Nov 28 2022 The U.S. Supreme Court decision in *Roe v. Wade* stands as a historic victory for abortion-rights activists. But rather than serving as the coda to what had been a comparatively low-profile social

conflict, the decision mobilized a wave of anti-abortion protests and ignited a heated struggle that continues to this day. Picking up the story in the contentious decades that followed Roe, *The Street Politics of Abortion* is the first book to consider the rise and fall of clinic-front protests through the 1980s and 1990s, the most visible and contentious period in U.S. reproductive politics. Joshua Wilson considers how street level protests lead to three seminal Court decisions—*Planned Parenthood v. Williams*, *Schenck v. Pro-Choice Network of Western N.Y.*, and *Hill v. Colorado*. The eventual demise of street protests via these cases taught anti-abortion activists the value of incremental institutional strategies that could produce concrete policy gains without drawing the public's attention. Activists on both sides ultimately moved—often literally—from the streets to fight in state legislative halls and courtrooms. At its core, the story of clinic-front protests is the story of the Christian Right's mercurial ascent as a force in American politics. As the conflict moved from the street, to the courts, and eventually to legislative halls, the competing sides came to rely on a network of lawyers and professionals to champion their causes. New Christian Right institutions—including Pat Robertson's American Center for Law and Justice and the Regent University Law School, and Jerry Falwell's Liberty University School of Law—trained elite activists for their "front line" battles in government. Wilson demonstrates how the abortion-rights movement, despite its initial success with Roe, has since faced continuous challenges and difficulties, while the anti-abortion movement continues to gain strength in spite of its losses.

Growing Tall In Colorado Sep 21 2019 Hannah Blue Heron's story of her childhood begins with the imagined thoughts of the infant in her mother's womb. Even though she is born with painfully twisted feet and a severe allergy to milk, Anna Georgette becomes a happy, busy child. She, her railroader father, her amazingly understanding mother and her much older sister moved twelve times in as many years, but with her violin, her beloved bike, Cap'n Henry and her devotion to the Girl Scouts, Georgette was always busy organizing circuses, puppet shows, a sports club and a "kid's" newspaper. However, The future Hannah Blue Heron developed into a deeply caring person for the concerns of others. Her own pains, coming first with her father's retirement as the family "learned to be poor", and later, with the realization that high school boys disdained girls who were five feet ten inches tall. Blue Heron's detailed and straight forward manner of telling her story, makes her like a Depression-era Laura Ingalls Wilder. Here is a childhood, that produced a professional violinist, a nun for seventeen years, a hippie, a member of the women's back-to-the-land movement, and a proud

lesbian/feminist/Buddhist writer.

**Billboard** Oct 03 2020 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. *Photoreceptors and Calcium* Sep 14 2021 This volume focuses on the status of Ca<sup>2+</sup> ions in regulation of phototransduction, light adaptation and the recovery phase in vertebrate photoreceptors. Particular emphasis is given to Ca<sup>2+</sup>-binding proteins and their targets, among them particulate guanylate cyclases, GPCR-coupled kinases and cyclic nucleotide-gated cation channels. The book also expands our understanding of events involving Ca<sup>2+</sup> in the retinal pigment epithelium, in synaptic transmission and secondary retinal neurons. A significant part of the book is dedicated to the role of Ca<sup>2+</sup> in invertebrate phototransduction, the best-studied phospholipid-mediated signal transduction pathway. Several chapters explore association of gene defects with human retina disease and the generation of animal models of retinal degeneration.
