Escape to Mars Oct 07 2020 When Skylar took up an interest in computers in school, she had no idea on where it would take her. With her then finding a fascination in Artificial Intelligence, her father then got her interested in androids... the ones that look like people, not the robots that make cars. NASA hasn't sent a manned mission past low earth orbit in fifty years. Underfunded and now barely able to properly man their ranks for any future missions, they are not in a good position when the President calls to say we need a mission to Mars, and we need it now. They also need help; the fears of radiation and issues facing astronauts on such a journey have left them with few options. The robotic systems used to land a few Habitats on Mars haven't been designed or

programmed to support such missions. They need an android to land on Mars. They need a colony established to support a follow up mission with 100 colonists. They need Skylar... before time runs out.

In Search of El Dorado Dec 29 2019 Reproduction of the original: In Search of El Dorado by Harry Collingwood

Blue Lake Christmas Mystery Oct 31 2022 All Holly wants for Christmas is to prove to her parents that her pricey college education was worth it. When she lands a reporting job in tiny Blue Lake, where the chill winds blow off Lake Huron all winter long, and a guest dies at a dinner party, she isn't sure she can meet that goal. Holly has a second writing gig as a true crime reporter in mind, but there's only one problem: the new love interest keeping her warm is determined she should not write about the one thing her heart desires. Bob has one goal: to get his life back on track after a train wreck of a relationship with a fragile first love named Lily. Oh, it would also be nice to feel excited about work again. Not to mention Christmas. Holly's new in town and she stirs something

cheerfully seasonal in him, but when he realizes she's willing to take down Lily for her own purposes, he decides a holiday romance is the last thing he needs.

Financial Management for Human Service Administrators May 02 2020

The second edition of Martin's practical text continues to provide a solid grounding of financial management for human services and social work students and professionals, while maintaining a concise and approachable style. Starting with a foundation of the basics of financial management, a comprehensive overview includes topics such as budgeting systems; financial accounting and the interpretation and analysis of financial statements; performance measures; forecasting of revenues, expenses, and caseloads; fee setting; government contracts and grants; fund development; risk management; and auditing. Readers apply the concepts, principles, and tools introduced in each chapter through case studies and exercises that encourage mastery of the content in real-world situations.

Augmented Reality with Unity AR Foundation Jul 28 2022 Explore the world of augmented reality development with the latest features of Unity and step-by-step tutorial-style examples with easy-to-understand explanations

Key Features Build functional and interactive augmented reality applications using the Unity 3D game engine Learn to use Unity's XR and AR components, including AR Foundation and other standard Unity features Implement common AR application user experiences needed to build engaging applications

Book Description Augmented reality applications allow people to interact meaningfully with the real world through digitally enhanced content. The book starts by helping you set up for AR development, installing the Unity 3D game engine, required packages, and other tools to develop for Android (ARCore) and/or iOS (ARKit) mobile devices. Then we jump right into the building and running AR scenes, learning about AR Foundation components, other Unity features, C# coding, troubleshooting, and testing. We create a framework for building AR applications that manages user interaction modes, user interface panels, and AR onboarding graphics that you will save as a template for reuse in other projects in this book. Using this framework, you will build multiple projects, starting with a virtual photo gallery that lets you place your favorite framed photos on your real-world walls, and interactively edit these virtual objects. Other projects include an educational image tracking app for exploring the solar system, and a fun selfie app to put masks and accessories on your face. The book provides practical advice and best practices that will have you up and running quickly. By the end of this AR book, you will be able to build your own AR applications, engaging your users in new and innovative ways. What you will learn

Discover Unity engine features for building AR applications and games Get up to speed with Unity AR Foundation components and the

Unity APIBuild a variety of AR projects using best practices and important AR user experiencesUnderstand the core concepts of augmented reality technology and development for real-world projectsSet up your system for AR development and learn to improve your development workflowCreate an AR user framework with interaction modes and UI, saved as a template for new projectsWho this book is for This augmented reality book is for game developers interested in adding AR capabilities to their games and apps. The book assumes beginner-level knowledge of Unity development and C# programming, familiarity with 3D graphics, and experience in using existing AR applications. Beginner-level experience in developing mobile applications will be helpful to get the most out of this AR Unity book.

Nursing Assistants Apr 24 2022 This comprehensive full-color student workbook contains worksheets for each chapter of Lippincott Textbook for Nursing Assistants, Third Edition. The worksheets are fully integrated with the text and offer exercises, questions, and learning activities for students.

Saunders Guide to Success in Nursing School, 2017-2018 - E-Book Nov 27 2019 The popular Saunders Guide to Success in Nursing School is a versatile organizational tool, a practical nursing orientation handbook, a clinical quick reference, and a resource directory all in one. This compact and affordable guide helps busy nursing students manage their time and perform to their fullest potential inside the classroom and during clinical rotations. The Guide not only provides time management and stress-reduction strategies, advise on study skills, and yearly, monthly, and weekly planners, but also comes equipped with a variety of helpful clinical tools like pain and neurological assessment scales, Joint Commission safety guidelines, information on common drug and lab values, and NCLEX preparation tips. An orientation section covers the latest developments in computer-based testing and flipped classroom instruction. A clinical reference section features information on electronic documentation and content on Post-Traumatic Stress Disorder Plus all the must-have information you need to survive nursing school including: NCLEX Exam strategies Time management and study tips Stress reduction techniques Common medication and IV therapy guidelines The Joint Commission's Do Not Use lists High-alert medications Normal vital signs, lab values, measurements, and conversions Updated weekly, monthly, and yearly calendars with prefilled dates from May 2017 through December 2018 help students organize their schedule at school and at home. New content on electronic devices and social medial alerts students to the hazards and pitfalls of using phones and engaging in social media while in nursing school and on the job.

Head First Python Aug 29 2022 Ever wished you could learn Python from a book? Head First Python is a complete learning experience for Python that helps you learn the language through a unique method that goes beyond syntax and how-to manuals, helping you understand how to be a great Python programmer. You'll quickly learn the language's fundamentals, then move onto persistence, exception handling, web development, SQLite, data wrangling, and Google App Engine. You'll also learn how to write mobile apps for Android, all thanks to the power that Python gives you. We think your time is too valuable to waste struggling with new concepts. Using the latest research in cognitive science and learning theory to craft a multi-sensory learning experience, Head First Python uses a visually rich format designed for the way your brain works, not a text-heavy approach that puts you to sleep.

Foundations of Programming Languages Nov 07 2020 This clearly written textbook introduces the reader to the three styles of programming, examining object-oriented/imperative, functional, and logic programming. The focus of the text moves from highly prescriptive languages to very descriptive languages, demonstrating the many and varied ways in which we can think about programming. Designed for interactive learning both inside and outside of the classroom, each programming paradigm is highlighted through the

implementation of a non-trivial programming language, demonstrating when each language may be appropriate for a given problem. Features: includes review questions and solved practice exercises, with supplementary code and support files available from an associated website; provides the foundations for understanding how the syntax of a language is formally defined by a grammar; examines assembly language programming using CoCo; introduces C++, Standard ML, and Prolog; describes the development of a type inference system for the language Small.
