Descriptive and classified membership directory of the National Association of Manufacturers of the United States, arranged for the convenience of foreign buyers.

First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. The rather young field of research into electricity savings is attracting increasing attention since low electricity consumption is a vital component of environmentally sustainable development. The potential benefits from using less electricity, without sacrificing quality of life, are immense, as the book shows with case studies from Eastern and Western Europe and the USA. Saving electricity means that the expense of constructing scores of power plants can be saved, and that their economic and environmental impact will vanish. Audience: Can be read with profit by any graduate. Suitable as a reference work for Master's and Doctoral students, as well as for others working on environmental issues in general and electricity savings in particular. First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.
